

# SAVINGS SPOTLIGHT

## Efficient Buildings Program

A Natural Choice.

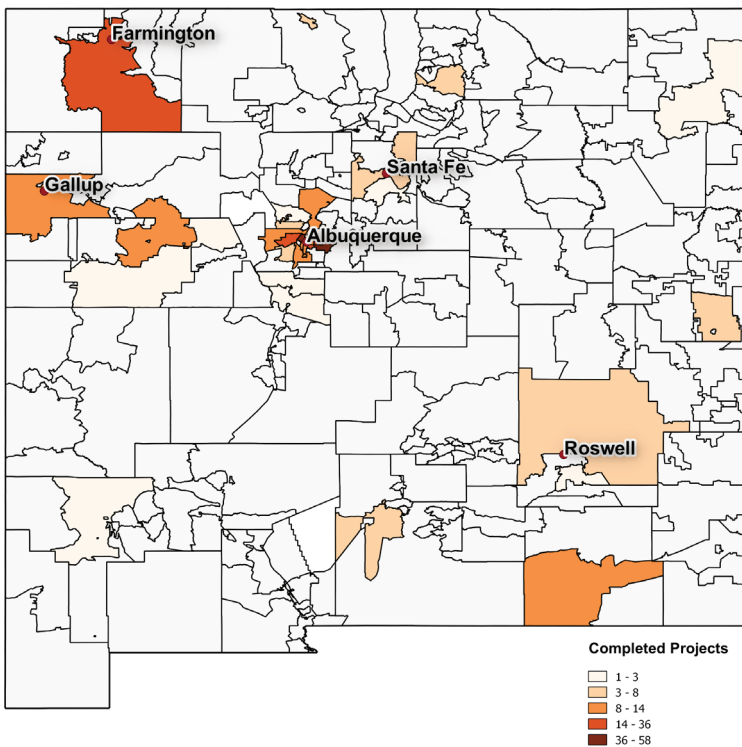

### How We Save

The Efficient Buildings Program helps school, commercial, industrial, and municipal customers reduce energy costs and use by identifying and implementing energy efficiency measures. We do this by assessing facilities, installing no-cost natural gas products and offering incentives for larger, more complex energy-saving equipment and projects.

### Where We've Saved

This heat map shows where we've completed projects in the Efficient Buildings Program throughout New Mexico. Hint: It's all over.

New Mexico Gas Company Projects Completed by ZIP Code

### Program at a Glance:

Since 2011

- 3,214 efficient measures incentivized for 860 uniquely, commercially metered locations
- \$3,158,466 in incentives awarded
- 5,534,568 annual therms saved
- 70,421,499 lifetime therms savings

### Lifetime therms are equivalent to:

- 80,284 gasoline-powered passenger vehicles driven for one year
- 372,600 metric tons of CO<sub>2</sub>
- 936 natural gas-fired power plants for one year
- 72,499 homes' electricity use for one year
- 101 wind turbines running for one year
